

Decoder / Solenoid Cable

Conductor construction is soft drawn bare copper meeting the requirements of ASTM Specifications B-3.

The insulation is a linear low density, high molecular weight polyethylene (PE) for conductor temperatures up to 75° C. A raised polarity ridge is present on one leg.

Application: Suitable for use with decoder systems in direct burial applications.

Conductor: Solid, soft drawn bare copper (ASTM Specs. B-3).

Insulation: Polyethylene (PE)

Temperature: 75° C

Voltage: 600 volts

Colors: Black, white, red, blue, green, yellow, brown, orange, gray, and purple.

Conductor Size

14

Insulation Thickness

.045

**RoHS
Compliant**
