

# Low Voltage Lighting Cable

**Conductor construction** is soft drawn bare copper meeting the requirements of ASTM Specifications B-3 and B-174. Sizes 18-2, 12-2, 10-2 and 8-2 have flexible stranding conductors.

The insulation is a high quality polyvinylchloride (PVC) for conductor temperatures up to 60° C.

**Application:** Suitable for use in direct burial landscaping and lighting applications. Sunlight resistant.

**Conductor:** Soft drawn bare copper (ASTM Specs. B-3 and B-174)

Flexible Stranded (18 awg thru 8 awg)

**Insulation:** Polyvinylchloride (PVC)

**Temperature:** 60° C

**Voltage:** 150 volts

Conductor Size	Stranding	Insulation Thickness
18	16	.045
12	65	.045
10	105	.045
8	165	.060

**RoHS**  
Compliant

Regency's Low Voltage Lighting Cable is manufactured for the purpose of direct burial landscape and lighting applications.
