

UF-B 2 Conductor w/Ground

Conductor construction is soft drawn bare copper meeting the requirements of ASTM Specifications B-3 and B-787. Gauge sizes 14 and 12 are solid copper conductors. Sizes 10 thru 6 are stranded conductors. All ground wires are solid.

The insulation is a color coded THHN / THWN type for wet, dry or corrosive applications of up to 600 volts and conductor temperatures up to 75° C. The outer jacket is a sunlight resistant, high quality polyvinylchloride (PVC).

Application: Suitable for use as direct burial or indoor branch circuit wiring.

Conductor: Soft drawn bare copper (ASTM Spec. B-3)
Solid (14 awg thru 10 awg)
Stranded (8 awg and 6 awg)
Solid ground

Insulation: Polyvinylchloride (PVC) with a nylon sheath

Outer Jacket: Polyvinylchloride (PVC)

Temperature: 75° C

Voltage: 600 volts

Regency's Type UF cables are intended for use in accordance with Article 339 and other applicable parts of the National Electrical Code in wiring systems operating at a potential of 600 V or less.

Gauge Size	Conductor Stranding	Ground Size
14	Solid	14
12	Solid	12
10	Solid	10
8	Stranded	10
6	Stranded	10
